Qualified Software Developer (Programming)

I am a graduate in ICT department with a Diploma in System Development, graduated at Boston City Campus in November 2023. Acquired website, mobile and desktop application development supported by both Android and Windows Operating Systems. Flexible with HTML, CSS, JavaScript, PHP, Java and MySQL programming languages. Willing to grow as a developer and learn different languages and other new advanced programming techniques. I am passionate about Information Technology, programming to be specific. I often perform well under pressure and with my skills set, I have a strong believe that I will someday add value to your organization.
